Joining Mirabaud, means entering an entrepreneurial and innovative environment. With the 7th generation of the Mirabaud family working within the bank, the culture is that of a family business. With over 750 employees based in 10 countries worldwide, Mirabaud offers opportunities to develop one's career across an international network of 16 offices.

Mirabaud is proud to announce the launching of the largest project since its foundation in 1819, pushing ahead its highly regarded entrepreneurial and passionate team to the next level of client servicing thanks to the adoption of enhanced digital front and back-office capabilities.
To support this ambitious digital transformation and migration to the cloud, our Data Hub, Reporting & MIS team is looking to add:

# Application Manager
## Banking Operations

**A day in your future job:**

- Responsible for the lifecycle application module: analyzing release notes, interfacing with the business to decide on changes, validating specifications, monitoring development and testing, piloting the go/no go and the production's go lives, ensuring acceptance and post-delivery documentation.
- Very good knowledge of Operations processes: Cash, Corporate Actions, Securities Transfers, Private Equity, …
- Enforce the Product Lifecycle Process and including obligations and best practices related to the application (Security, Data Protection, compliance & Regulation, methodology).
- Define and monitor the backlog of the application.
- Support the operation team during 'Run' of the application – in coordination with the product team.
- Responsible for the relationship with the vendors: managing its release note for adaptive or evolutionary maintenance, bug correction, data correction.
- Point of contact for the Release Manager.
- Intervene at the request of the Product Owner: business or management relationship.
- Ensure application ease of use for stakeholders.
- Managing financial budgets for both specific projects and day-to-day running.
- Troubleshoot and resolve any incidents or problems with the product team.
- Report on the progress of technical issues to senior managers, end-users, and other stakeholders.
- Maintain up-to-date knowledge of latest software developments.
- Supports Test Manager in draft test cases and related acceptance criteria.

**Your assets to succeed:**

- Degree in computer engineering or a master's degree.
- Technical expertise and functional knowledge of banking products.
- Knowledge of advanced systems methods, analysis, principles, and practices
- Knowledge of modelling principles and tools
- Experience preparing workflow mapping and analysis
- Experience with programming languages, server software, and systems.
- Understanding of software development life cycles, systems programming, scripting and DevOps methodology.
- Comfort working with teams, clients, and vendors to identify and solve problems.
- Leadership, empathy and strong communication skills.
- Organized and autonomous in solving problems.

- Excellent priority management skills, very good attention to details
- Leadership skills that inspire technical teams to achieve project success.
- Fluent French & English

**Jump on the boat!**

- Family-friendly and dynamic environment;
- Direct impact on the business, no matter your position or seniority;
- Work in an environment that encourages autonomy and entrepreneurship;
- Flexible working arrangements to help you achieve a better work-life balance;
- Variety of cultural and sporting activities during your free time;
- Inclusion and equal treatment;
- Various employee benefits & family friendly benefits.
